

Mindr Mobile™

I can stay independent and know you're there

Acting for you when you can't.

Personal Monitor

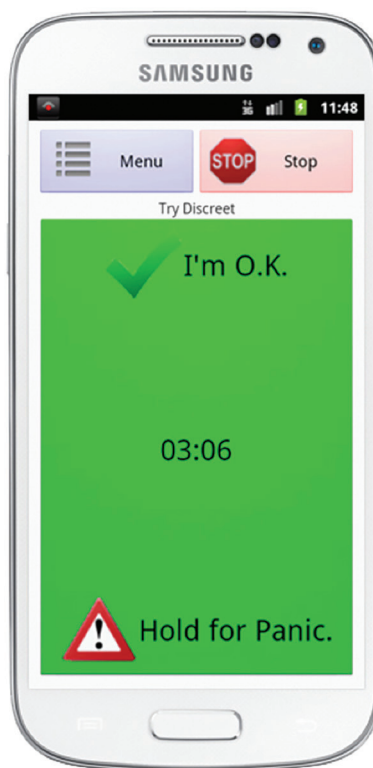

How it works: It checks on you and if you don't respond by tapping the screen, an ALERT with your GPS location will be sent to your contact via text message, email, or voice call.

Activity settings: enter your typical daily activities and your contact will see your activity in the ALERT message. You can enter your Trip Details in this area on the home screen, along with your current photo.

The unique DISCREET options: others won't see that the App is running on your Smartphone, and won't be able to turn off the App. The warning reminder feature appears as an incoming call screen, so people with you are not aware that the App is checking on you.

Start using Mindr Mobile Personal Monitor app solution now, on iPhone, Android (i.e. Samsung), and Blackberry (i.e. BB 10 and previous operating system).

Download a free trial from app stores, or www.mindrmobile.com

"A simple, affordable Personal Monitor Smartphone App to give peace of mind."

Personal Monitor will regularly check on you and sends ALERT messages if you can't respond.
